

JAUME MESTRES

THE VISION

The horizon is that unreal place we never reach. It is the limit and, at the same time, the secret possibility of transcending it. A convention in space and time that coexists with us as something absolutely normal, even though it is intangible. Mountain ranges and rivers become natural boundaries, while the palpable political horizons are product of reasoning. And in the mind, silence delimits the cartography, layer by layer. The entire world is a picture and the painter is in the picture.

What is there between thoughts and thoughts?

Jaume Mestres Angla
Manresa, 1964

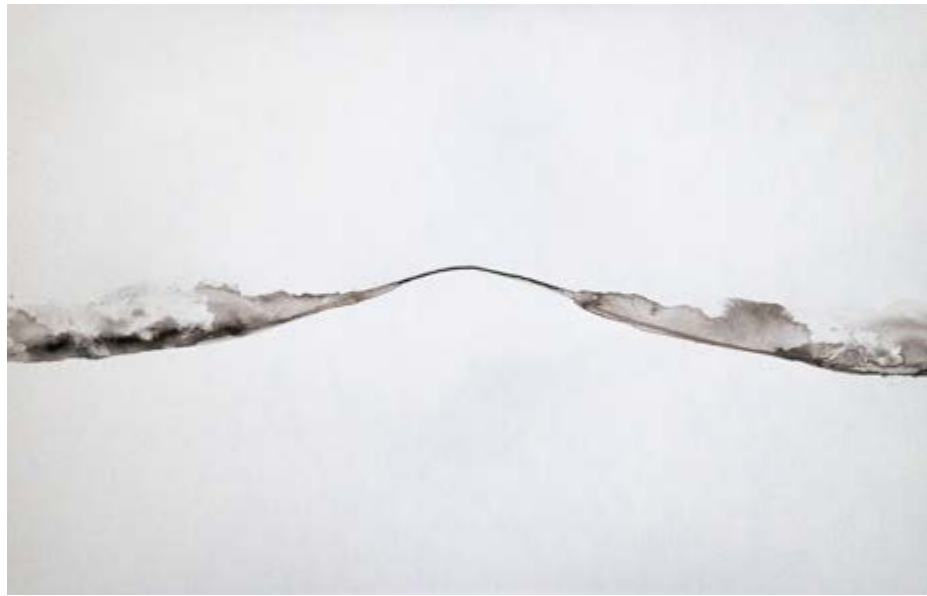

From his family tradition he has inherited much of his knowledge and many of his techniques in terms of painting materials, as well as a great sensitivity. He studied at the Faculty of Fine Arts of the University of Barcelona, where he specialized in painting. In 1991 he received a bursary to go to the National School of Fine Arts in Paris.

As well as pictorial art, his professional career has carried out a long list of work and experiences including graphic workshops, chromatism, stage design, restoration, decoration and photography. Tradition and craftsmanship became the backbone of his contemporary art, along with experimentation, innovation and philosophy. Jaume Mestres has held exhibitions in different venues and galleries since 1989. His works can be found in various private collections, largely in Europe.

“The Visions of the Interval”
